SOUNDWAVE® SWELL
Acoustic Panel
By Teppo Asikainen

OFFECCT

OFFECCT

PRODUCT INFORMATION

Soundwave® Swell was one of the first panels launched by Offecct. Its core values lies in its function, and Teppo Asikainen refused to compromise with the look. The piece has a very strong personality and acts as a kind of 3D wallpaper giving the room the right aesthetic feeling and acoustic at the same time.

Soundwave® Swell Diffuser provides sound diffusion rather than absorption. Correctly positioned, the diffuser panels will improve speech intelligibility and even improve privacy in open spaces as the speaker does not need to talk loudly in order to be heard.

ENVIRONMENTAL LABELING

TECHNICAL INFORMATION

Available for the United States market.

Swell is a lightweight sound absorber in the upper frequency range (500 Hz and above). These panels help reduce disturbing reflections of environmental noise such as voices, telephones etc. Recyclable moulded polyester fibre in anthracite, grey, green and offwhite alt. upholstered in Europost.

Soundwave Swell Diffuser is made of 100% PET and is available in semi-transparent white.

BASFIL

ACCESSORIES

Seperate filling made of recycled textile and PET. Basfill is being placed inside the Soundwave Swell in order to improve sound absorption in the lower frequency range (150-500 Hz). Basfill is available as accessories to all panels exept for Luna and Pix.
